## WSP6582C

## SwitchPro Family High Fidelity Stereo SPDT Switch with Pop and Click Suppression

## Descriptions

With SwitchPro technology, The WSP6582C is a Dual SPDT analog switch with ultra-low distortion, high OFF-Isolation for special stereo audio applications with negative swing audio signals capacity that features ultra-low Ron of $0.2 \Omega$ (typical) at 3.3 V VCC.

The WSP6582C operates a single power supply over a wide range from 3.0 V to 4.5 V and 1.8 V logic compatible with ultra high PSRR. With soft-start feature that eliminates pops and clicks associated at any application conditions likes switched, enable/disable and power-up.

With superior THD +N performance and other high performance, the WSP6582C is an ideal device for $\mathrm{Hi}-\mathrm{Fi}$ system applications.

The WSP6582C is available in 12 Ball Wafer Level Chip Scale Package (WLCSP) with $1.2 \times 1.6 \times 0.5 \mathrm{~mm}$. All products is Pb -free and Halogen-free.

## Features

- Single supply range operating from 3.0 V to 4.5 V
- -118 dB THD +N into $100 \mathrm{k} \Omega$ load at 2 V rms
- -114 dB THD +N into $32 \Omega$ load at 2 V rms
- Signal-to-Noise (SNR) Ratio 132dBA
- 100 dB PSRR at 10 kHz
- 137 dB crosstalk \& separation
- Adjust soft-start with external capacitor

## Applications

- Hi-Fi Smartphones and Portable Device
- Hi-Fi SACD/DVD players
- High Quality Home Theaters

Order information

| Device | Package | Shipping |
| :---: | :---: | :---: |
| WSP6582C-12/TR | WLCSP-12B | 3000/Reel\&Tape |

Pin descriptions

| Pin Number | Symbol |  |
| :---: | :---: | :--- |
| A1 | L1 | Left normally closed pin |
| A2 | L | Left common pin |
| A3 | L2 | Left normally open pin |
| B1 | VCC | Power supply |
| B2 | SEL1 | Select control pin for Left |
| B3 | CAP | Soft-start rising time control with external ceramic capacitor |
| C1 | MUTE | Signal mute control pin |
| C2 | SEL2 | Select control pin for Right |
| C3 | GND | Ground |
| D1 | R1 | Right normally closed pin |
| D2 | R | Right common pin |
| D3 | R2 | Right normally open pin |

## Recommend operating ratings ${ }^{(2)}$

| Parameter | Symbol | Value | Unit |
| :--- | :---: | :---: | :---: |
| Supply Voltage | $\mathrm{V}_{\mathrm{CC}}$ | $3.3 \sim 4.5$ | V |
| Digital Control Input Voltage | $\mathrm{V}_{\text {IN }}$ | $0.0 \sim \mathrm{~V}_{\mathrm{CC}}$ | V |
| Analog Input/Output Voltage (L1,L2,R1,R2,L,R) | $\mathrm{V}_{\text {IS }}$ | $-3.3 \sim \mathrm{~V}_{\mathrm{cc}}$ | V |
| Operating Temperature | $\mathrm{T}_{\mathrm{A}}$ | $-40 \sim 85$ | ${ }^{\circ} \mathrm{C}$ |

## Note:

1. "Absolute Maximum Ratings" may cause permanent damage to the device. This is a stress only rating and operation of the device at these or any other conditions beyond those indicated in the operational sections of this specification is not implied.
2. The input and output negative voltage ratings may be exceeded if the input and output diode current ratings are observed.

DC Electronics Characteristics
( $\mathrm{Ta}=25^{\circ} \mathrm{C}, \mathrm{VCC}=3.6 \mathrm{~V}, \mathrm{~V}_{\mathrm{IS}}=2 \mathrm{Vrms}, \mathrm{R}_{\mathrm{L}}=32 \Omega, \mathrm{f}=1 \mathrm{kHz}, \mathrm{CAP}=0.1 \mathrm{uF}$, unless otherwise noted)

| MUTE pull-up resistor | Rpu |  |  | 4 |  | $\mathrm{M} \Omega$ |

## Note:

3. Flatness is defined as the difference between maximum and minimum value of ON-resistance at the specified analog signal voltage points.
4. Ron matching between channels is calculated by subtracting the channel with the highest max Ron value from the channel with lowest max ron value.
5. Crosstalk is inversely proportional to source impedance.

## Test Circuits

ON-Resistance (Ron)

## Crosstalk (Xtalk)

Bandwidth (BW)

ON/OFF Time Waveforms (Ton / Toff)
